

ETERNITIVE

A COMPLETE SOLUTION IN ENGINEERING

**DESIGN, MANUFACTURING & SERVICING
OF ALL TYPES OF HEAT EXCHANGERS
ALL BRAND PHE SPARES**

**CIP SYSTEM | ZLD PLANTS
CLEAR WATER SOLUTION | BULK MILK COOLERS**

ABOUT US

Eternitive® is ISO 9001:2015 certified company started in 2018 with an objective to provide on site heat exchanger servicing & spares parts support in the heat exchanger category. Platex is now known as one of the top heat exchanger manufacturers in India owing to its expertise in after-sales market. We are registered under MSME initiatives of the Indian Government to promote the Indian manufacturers.

Eternitive® India offers a complete spectrum of manufacturing of all types of heat exchangers along with onsite servicing and spare for all types & brands. One manufacturing unit and 3 service centres are available to cater all the requirement of heat exchangers. Platex® has a facility where all types of heat exchangers are manufactured under one roof.

We have more than 250 clients in National & International market, and with the expertise, we deliver 24/7, 365 days support in on site refurbishment of any type of heat transfer equipment.

Eternitive® produce all kinds of heat exchangers, which includes shell & tube, plate & frame, finned tube, spiral, brazed & Semi-welded. Portable online Clean In Place System (CIP), BMC, Effluent treatment system, hot water generation system, evaporators, condensers and unique water solution are some of the other products manufactured by Platex® India. Platex® carries an Inventory for all brands PHE spares, which can save a good amount of equipment down-time and delivers a quick response to the client's need.

Eternitive® infrastructure today boasts up a state - of - art manufacturing facility in Wadki, Pune and a strong network across all India to meet ever-growing needs of the industry in the domestic market. Platex® is working on existing and future processing techniques for HE solutions. The findings enable us to offer innovative products and solutions enhancing competitiveness in terms of new product development and processing techniques.

OFFERINGS

PRODUCTS

- Bulk Milk Cooler
- Plate Heat Exchanger
- Shell & Tube Heat Exchanger
- Effluent Treatment Plant (SS)
- Hot Water Generation System
- Portable Clean In Place System)
- Air Fins Heat Exchanger (Radiators)
- Clean Water without Chemical (Patented Solutions)

SERVICES

- All Brand PHE Spares
- HeX Servicing and Refurbishment
- Condenser Tube Replacement
- Heat Exchanger Health Check
- HeX Annual Maintenance Contract

REVOLUTIONARY PLATE HEAT EXCHANGERS BY ETERNITIVE®

(Industrial & Food Grade)

Our Eternitive® standard plate heat exchangers are the ideal choice for a wide range of applications across numerous market segments. Innovative technologies and smart design make our standard plate heat exchangers a stellar investment and the go-to choice for standard duties.

We have one to one solutions for any brand of heat exchangers in the world and we customize each heat exchanger to meet your exact requirements. The versatile design and high thermal efficiency make them the perfect solution for a wide range of applications.

SANITARY PLATE HEAT EXCHANGERS

Our Eternitive® sanitary plate heat exchangers use FDA complaint compliant materials and are designed to use in food, dairy, and beverage applications as well as other applications with strict sanitary requirements. We have the in-depth process knowledge and extensive experience needed to engineer hygienic, high - performance solutions.

TECHNICAL SPECIFICATIONS

APPLICATIONS

- ⚙ HVAC industry
- ⚙ Heavy industry
- ⚙ Mining industry
- ⚙ Sugar industry
- ⚙ Biogas industry
- ⚙ Chemical industry
- ⚙ Pulp and paper industry
- ⚙ Petrochemical industry
- ⚙ Marine/offshore industry
- ⚙ Dairy/food/beverage industry
- ⚙ Industries with Sanitary requirements

Frames designed according to FEA and PED 2014/68/EU (EN13445) and ASME sec VIII, Div.1 construction standards

Plate materials: AISI 304/316, titanium, SMO, Hastelloy*

Connections from DN25 to DN600 (1" to 24")

Working temperatures from -20 °C to 180 °C

Gasket materials: EPDM-HT, NBR-HT, Viton*

Flow rates up to 7,200 m³/h (31,700 gpm)

Other materials are available upon request

Working pressure up to 35 bar (500 psi)

Plate lengths up to 5.5 m (18 ft)

PLATE HEAT EXCHANGERS FEATURES AND BENEFITS

- ⚙ Experience the benefit of an individually customized solution that perfectly matches your requirements and lowers your energy consumption.
- ⚙ High performance and a low pressure drop eliminate unnecessary burdens on your system and optimize overall system performance.
- ⚙ We design single - pass solutions when possible, as they are the preferred choice for almost all duties. With all connections on the head you do not need to disconnect the heat exchanger from the piping to perform inspection, cleaning, or service.
- ⚙ The design results in a compact solution with a small footprint, simple installation, and easy access for maintenance.
- ⚙ Heat exchanger solutions that adhere to the strict hygienic demands of the industries and complies with FDA material standards.
- ⚙ Plate technology made to provide the highest output product quality.
- ⚙ We ensure gentle media treatment during processing with precise flow control, perfect temperature profiles, and the optimal residence time for all applications.
- ⚙ Cladded or stainless-steel frames designed to be easily accessible for quick and trouble-free inspection, maintenance, or cleaning—including cleaning in place (CIP).
- ⚙ Enjoy huge savings on your power consumption with our regenerative pasteurizers that can recycle up to 95% of the energy.

SHELL & TUBE HEAT EXCHANGERS

Eternitive® is one of most-admired name in supply of home grown heat exchangers in the process industry. Our heat exchangers are extensively used in many industries such as chemical, steel, fertilizer, petrochemical, pharmaceuticals, agro-chemicals, power, cement, evaporation and effluent treatment as well as general manufacturing industries.

WHY CHOOSE ETERNITIVE® HEAT EXCHANGERS

- ⚙ Enhanced technology
- ⚙ Wide range of fin shapes, tubes, headers and materials
- ⚙ In house design and manufacturing technologies
- ⚙ Complete service packages
- ⚙ Fast delivery
- ⚙ Long life cycle

FINNED TUBE HEAT EXCHANGERS

Finned tube bundles with aluminum fins are considerably more lighter, are insensitive to soiling and easy to clean. On the other hand, systems using galvanized steel offer a very long service life of up to 30 years, are extremely resistant to mechanical influences such as hailstorms and provide optimum corrosion protection as aluminum.

Air coolers are used in fundamentally different and sometimes extremely difficult ambient conditions. This refers to both production processes and climate-related conditions.

PHE SPARES

Eternitive® maintains an extensive inventory of spare parts of PHE for most of the reputed brands, that supports less down time and immediate delivery. Our parts inventory system contains specific information such as technical details and availability for more than 150,000 parts, and we have more than 10,000 unique items in stock. Most importantly we provide warranties on our spares to give confidence to customer about the quality of the product.

Unmatched quality - Designed for durability, reliability and productivity, our parts deliver outstanding performance. Manufactured to precise specifications interchangeable gaskets and plates to replace old OEM parts with competitive price and proven performance.

A smart choice Boost productivity and maximize uptime with quality spare parts from Eternitive®. With easy access to a broad range of long-lasting high-quality parts. Get your PHE Spares from Eternitive® and rest assured for the performance of the HE. Get any brand PHE Spares under one umbrella and we will take care of site installation support with our experts.

We carry inventory of Alfa Laval, Tranter, Kelvion (Gea), Sondex (Danfoss), IDMC, Funke (HRS), Tetrapack, and other major OEM PHE Spares like Heat Transfer Plates & Gaskets.

ON SITE SERVICING

A poorly functioning heat exchanger may affect safety, product quality and energy costs. Failure may lead to costly downtime and major losses in production. By regular and proactive maintenance of your heat exchanger performance is preserved and operations kept trouble - free and predictable.

We have the expertise to help you whether you experience a problem today, wish to prevent future issues or want to solve the problem yourself with our onsite troubleshooting service.

We understand how important it is to get your process back on track quickly.

Our experienced technicians know what to look for and have the latest and most innovative technology at their disposal to identify leaks, find inefficiencies and bring your plate heat exchanger back up to peak performance. We know about pressure drops and loss of flow. Our team will prescribe the best solutions, refurbish or fix your plate heat exchanger.

Whether it's emergency repair scheduled maintenance or reconfiguring plates, we can have someone onsite at your location quickly. No matter your industry, count on Platex® for optimum plate heat exchanger service.

PORTABLE CLEAN IN PLACE SYSTEM

Quick, effective cleaning

Eternitive® fully automatic portable CIP systems connect directly to your heat exchanger connections and circulate a mixture of heated non-toxic cleaning agents that effectively remove scale, product deposits and bio-fouling. This leaves process surfaces clean and restores the performance of your equipment.

Process Liquid: Chemical cleaning agent

Power Supply: 3 Phase / 380-415VAC/ 50Hz

Application Cleaning in place of Heat Exchangers Tank & Trolleys

Material of Construction: AISI 304

Tank Capacity: 100, 200, 400, 600, 800, 1000 ltrs

Pump Type: Centrifugal

Capacity: 6m³/hr to 50m³/hr

Motor KW 2 to 5.5 | Wetted Parts Material ss316

BULK MILK COOLER

- ❁ Raw milk producers have a choice of either open (from 150 to 3000 liters) or closed (from 1000 to 10000 liters) tanks.
- ❁ The cost can vary considerably, depending on manufacturing norms and whether a new or second hand tank is purchased.
- ❁ Milk silos (10,000 liters and plus) are suitable for the very large producer.
- ❁ Silos are designed to be installed outside and adjacent to the dairy, all controls and the milk outlet pipe being situated in the dairy.

SMALL SCALE EFFLUENT TREATMENT PLANT

(SINGLE EFFECT EVAPORATION SYSTEM)

Coil Type Evaporation System for Industrial Effluent Water Industry, Pharma, API, Chemical, Plastic & Rubber, Dairy, Food Processing.

Maximum TDS can be handle upto 30,000 PPM

Movable Skid based system

Crystal clear condensate with less than 250 ppm TDS.

PID based field mounted control panel..

Single operator can handle system.

SPIRAL HEAT EXCHANGERS

- ⚙ 25m² SS 316 Edible Oil
- ⚙ 2m² - SS 316L Condensers
- ⚙ 115m² SS 304 - Steel Industry
- ⚙ 4m² SS 304 - Skid Based Unit
- ⚙ 4m² SS 316 - Product
- ⚙ 2m² SS 316 - Condensor + Sub - Cooler
- ⚙ 6m² SS 316L - Condensers
- ⚙ 2m² / 6m² SS 316 - Skid Units
- ⚙ 10m² SS 316 - Sludge Heating

PLATEX INDIA

HEAT EXCHANGER MANUFACTURING, SERVICE & SPARES UNDER ONE UMBRELLA

Niranjan Mehta,
Director

The global heat exchanger market reached value of US\$16.3 billion in 2021 and is expected to reach to US\$22.4 billion by end of 2027, showing the CAGR of 6% during the 2022-27. The growth can be attributed to the rising demand for advanced thermal engineering solutions across several industries such as oil, gas, petrochemicals, food, beverages, pharmaceuticals, chemicals, etc. However, in India, despite the abundance of multiple multinational manufacturers, the availability of efficient after sales services is scarce. Lack of domestic spare parts manufacturing makes the entire industry heavily rely on imports. This is where Platem India came to offer a comprehensive spectrum of onsite servicing solutions for heat exchangers while putting forward one manufacturing plant and three service centres to build and repair all kinds of heat exchangers.

Started in 2018, Pune based company came up with a complete range of after sales support for every brand of heat exchangers; the objective is to eradicate the unavailability of immediate site support. Platem India is an ISO 9001:2015 certified company who entered the league of top heat exchanger manufacturers in a very short span. The

domination of multi-nationals in Indian industry with extensive lead time, expensive spares & minimal after sales support, Platem became the prime mover owing to its expertise in after-sales.

“As the small size industries are booming in India this innovation is going to prove itself as an essential need of the time to come”.

Array of Offerings

Platem offers a complete range of manufacturing of heat exchangers along with onsite servicing and spares for every brand. Platem, unlike other manufacturers who deal in a specific type, Platem has set up a facility to manufacture all types of heat exchangers such as shell & tube, plate & frame, finned tube, spiral and Semi-welded under one roof. With expertise in the field, Platem delivers 24x7, 365 days service support along with authentic spares at a reasonable price. Platem is serving more than 250 clients in national and international markets.

CO₂, Pump-Condenser and Clean water solution are other innovative products manufactured by Platem. Portable fully-automated Clean-in-Place systems is used as an online heat exchanger cleaning equipment. Platem managed to sell more than 60 CIP systems within a year which exhibit the need of the hour. Dump condenser has shown immense savings in terms of heat recovery from waste steam. Clean water solution is invented to keep the cooling tower lines clean.

Niranjan Mehta, Director of Platem India adds, “The top-notch manufacturers are reluctant on price, delivery, and after sales care. Overlooking the MSME and Start-up India initiatives of the Indian Government to support the Indian manufacturers, the Indian users are more prone to the brand names. The end-users should support the local manufacturers and help them publicize their bringing. The advantages of encouraging homegrown companies are enormous. At Platem, we emphasize on government initiatives like ‘Make in India’ and ‘Vocal for Local’.

Future Prospects

Upon their future endeavours Mehta adds, “We are expecting the Indian market to touch US\$800 million to US\$850 million by 2026. Likewise, we are expecting the same rate of reasonable growth in our company. Currently we have capacity to manufacture 90% of the parts in our unit, however, we are planning to upgrade our facility to install all sort of machineries essential for manufacturing of heat exchanger along with fully equipped service centres at prominent locations and service vans in near future. As the small size industries are booming in India this innovation is going to prove itself as an essential need of the time to come”.

TO WHOMSOEVER IT MAY CONCERN

We would like to place on record that the Clean Water without chemicals supplied by M/s Platem India, Pune is performing satisfactorily in our plant.

CWWC of 100mm ID NGs were installed in 2020 and 2021, for the water supply lines. At our ROLLER Pressure 1 & 2 Gear Box Heat exchangers, VRM and COMPRESSOR Heat Exchanger for avoiding the scale formation in the Plates of PHE, Tubes of Shell & Tube Heat Exchanger.

After the installation of CWWC, we have observed that there is no scale formation and the Heat Exchangers performance has improved. The maintenance expenditure of this ISS is Nil, as there are no moving parts. Power consumption is very minimal, between 2-3 units per month for the control panel. In the long run, we can have a lot of savings as the breakdowns because of scaling in the pipes can be eliminated besides savings in avoiding chemical dosing for water softening. These ISSs are eco-friendly.

We have installed Platem Type Heat Exchangers manufactured under make in India initiative by Platem India. We found the quality, delivery, and price of the product at par and performance is also satisfactory.

We wish M/s Platem India all the best in their endeavor to reduce the environmental impact by installing (CWWC) for softening of water in industry and appreciate heat exchanger after sales service initiative.

We wish them all the best in for promoting use of innovative Clean Water without chemicals and encouraging Make in India initiative.
